Professional Summary

Data and Business Analytics professional with skills in Python, SQL, Power BI, Excel, and ETL processes. Experienced in analyzing large datasets, developing interactive dashboards, automating reports, and applying analytical techniques to generate actionable insights. Passionate about using data to improve business decisions and operational efficiency.

Technical Skills

Languages	Python, R, SQL, C
Libraries	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, NLTK, TextBlob
Analysis	Data Wrangling, EDA, Statistical Analysis, Regression, A/B Testing, NLP
BI & Tools	Power BI, Excel (Advanced), SPSS, Dashboard Design, Data Storytelling
Concepts	KPI Reporting, Predictive Analytics, Trend Analysis, Stakeholder Reporting, Data Governance

Internship

Data Science & Analytics Intern — Future Interns

June 2025 – July 2025

- Engineered 3+ Power BI and Excel dashboards for real-time KPI monitoring, reducing manual reporting effort by **40%**.
- Analyzed 50,000+ campaign records across CTR, engagement, and conversion metrics, identifying high-performing audience segments that contributed to a reported 25% improvement in campaign ROI.
- Built a Python NLP sentiment analysis pipeline on **1,200+ customer responses**, achieving **85%** classification accuracy and uncovering key customer sentiment trends.
- Designed ETL workflows to extract, clean, and transform multi-source data, cutting data preparation time by **30%**.

Projects

Retail Executive Performance & Risk Analytics Dashboard | *GitHub*

- Developed an executive Power BI dashboard analyzing **$70.26B+ in net sales** across multi-channel store formats (Flagship, Express, Mall) to drive strategic retail decisions.
- Engineered dynamic DAX measures and KPI scorecards tracking **$69.32B Net Revenue**, **29.40% profit margin**, and operational risk indicators.
- Monitored inventory availability and return risks using benchmark target gauges, maintaining return rates at **1.54%** (below the 2.00% risk threshold) and tracking a **4.33% stockout rate**.
- Implemented an **AI-powered Decomposition Tree** and store performance matrix with conditional formatting for root-cause analysis of regional stockout spikes.

Retail Sales Intelligence System | *GitHub*

- Built an end-to-end retail analytics platform processing **9,994+ sales records** through automated ETL pipelines.
- Designed a PostgreSQL star-schema data warehouse with fact and dimension tables for business intelligence reporting.
- Developed and optimized **16+ SQL analytical queries** to evaluate revenue, profitability, customer lifetime value, and sales trends.
- Implemented **6-month sales forecasting** using Prophet and delivered insights through interactive Power BI dashboards.

Education

Master of Business Administration (MBA) *2024–2026*
University of Lucknow

Bachelor of Education (B.Ed.)
Maharaja Suhel Dev State University

Diploma in Computer Application — NIELIT (O LEVEL)

Bachelor of Commerce (B.Com.)
University of Allahabad

Certifications

Microsoft: Career Essentials in Business Analysis | **Google:** Foundations: Data, Data, Everywhere | **TATA:** GenAI-Powered Data Analytics Simulation

Deloitte: Data Analytics, Cyber & Technology Simulations | **TCS iON:** Career Edge — Young Professional | **SkillUp:** Power BI for Beginners
